

# Digital Geometry -Motivations

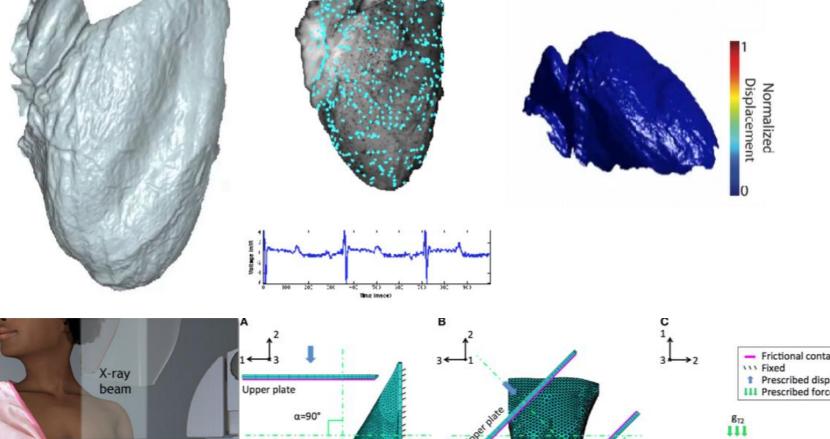

Junjie Cao @ DLUT Spring 2017

http://jjcao.github.io/digital-geometry/

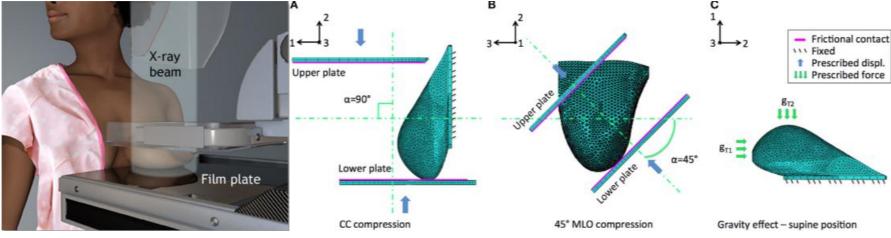

Pleasure may come from illusion, but happiness can come only of reality.

## Impacting Science

### Cardiology

Mammographic

#### Computational archaeology

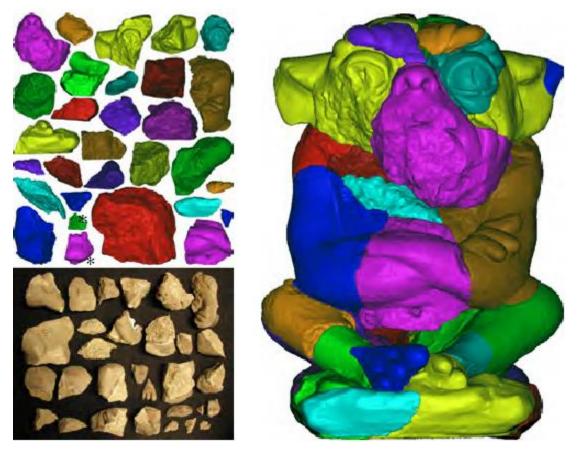

Eg14\_Content-Aware Surface Parameterization for Interactive Restoration of Historical Documents

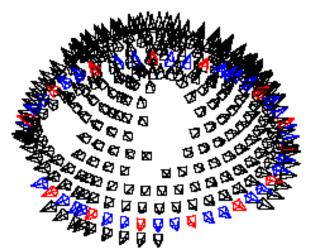

Reassembling a gargoyle statue: photo (bottom left) and 3D models (top left) of the fragments, final assembly (right).

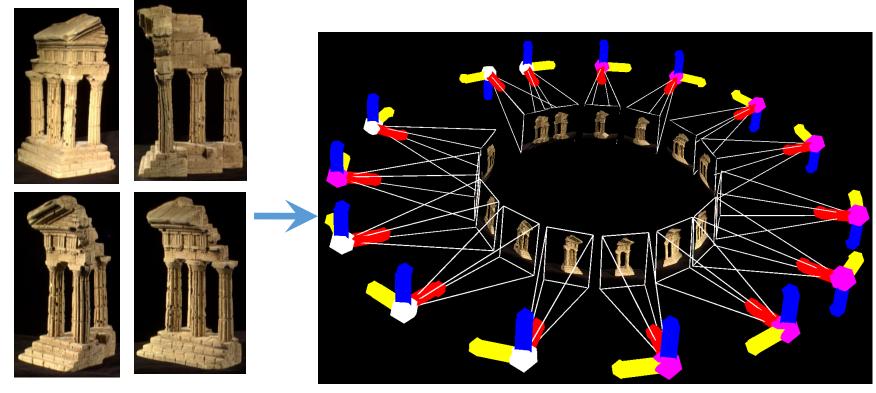

#### Multi-View Stereo

2017/2/22

### Image Calibration

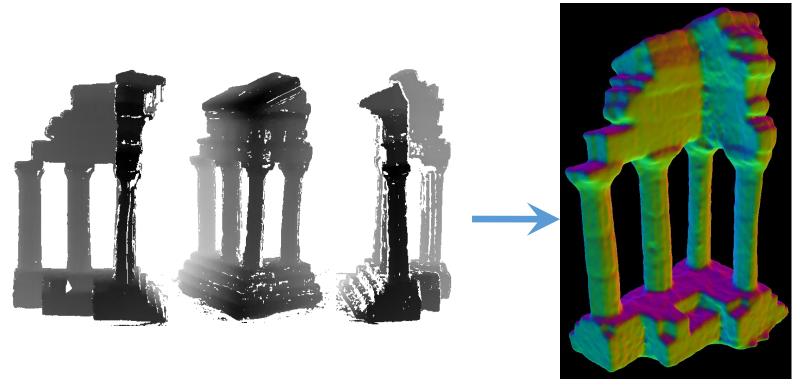

- Input: set of pictures
- Output: camera position, orientation, intrinsic parameters (focal length, optical center)

#### Depth Map Construction

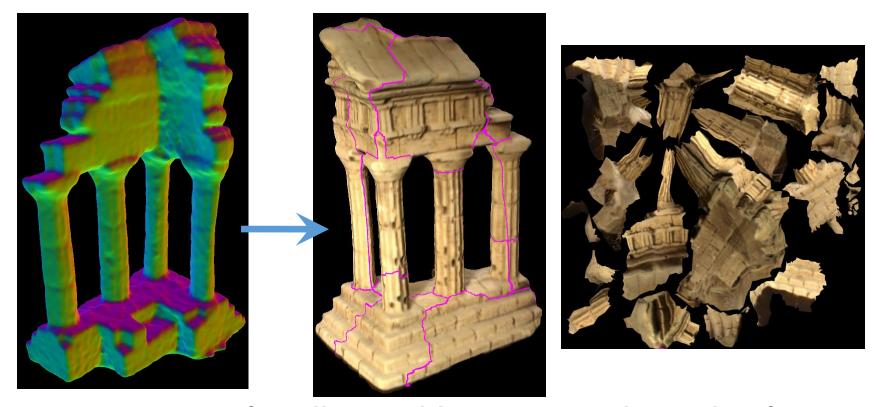

- Input: set of calibrated images
- Output: distance to object for each pixel in the image

#### Mesh Registration & Reconstruction

- Input: set of calibrated images & depth maps
- Output: mesh of object

#### **Texture Generation**

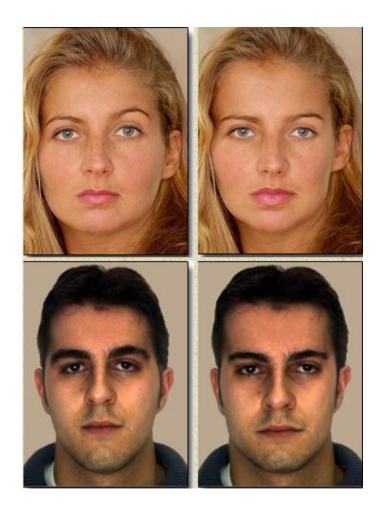

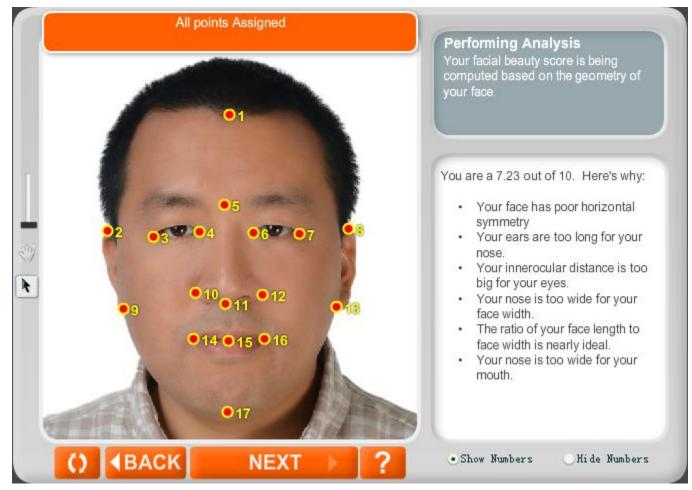

- Input: set of calibrated images and mesh of object
- Output: atlas and texture

### **Evolutionary Biology**

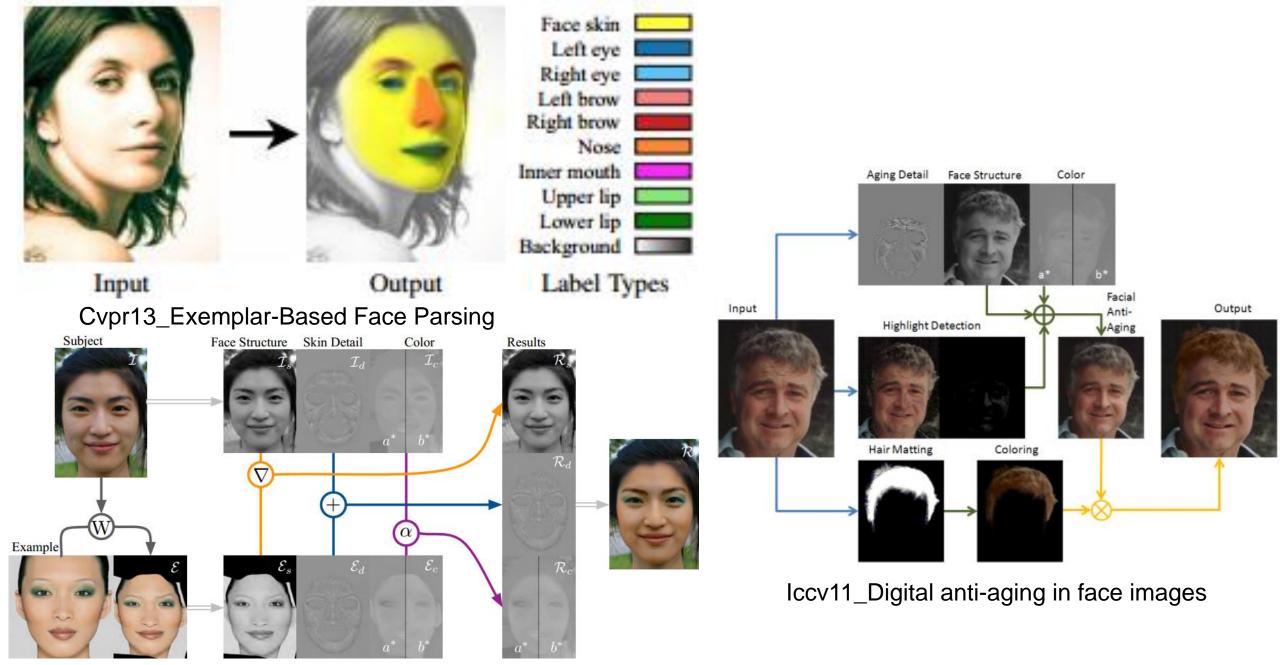

#### Computational aesthetics

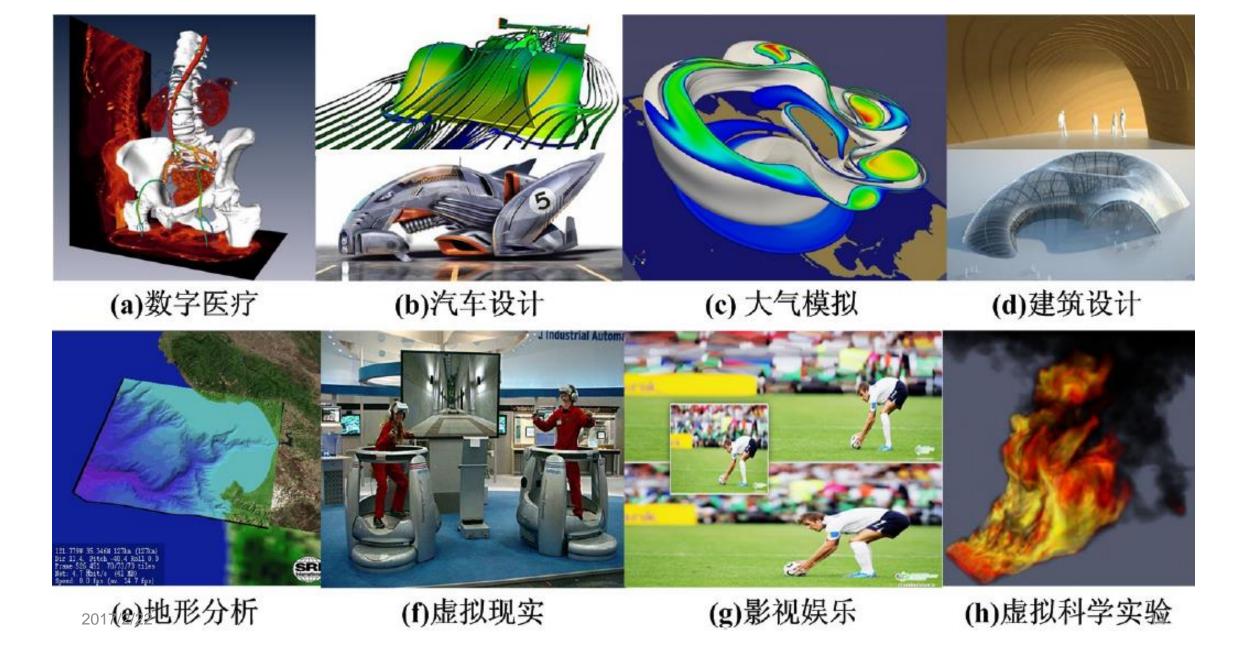

• Facial Beauty Analysis - Score Your Face

cvpr09\_Digital Face Makeup by Example

#### **Applications**

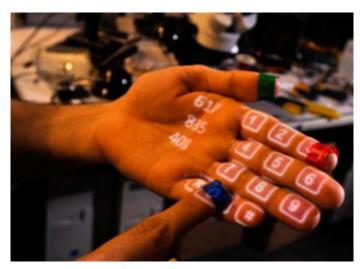

## Digitized Future

#### Webcam Social Shopper: the virtual dressing room

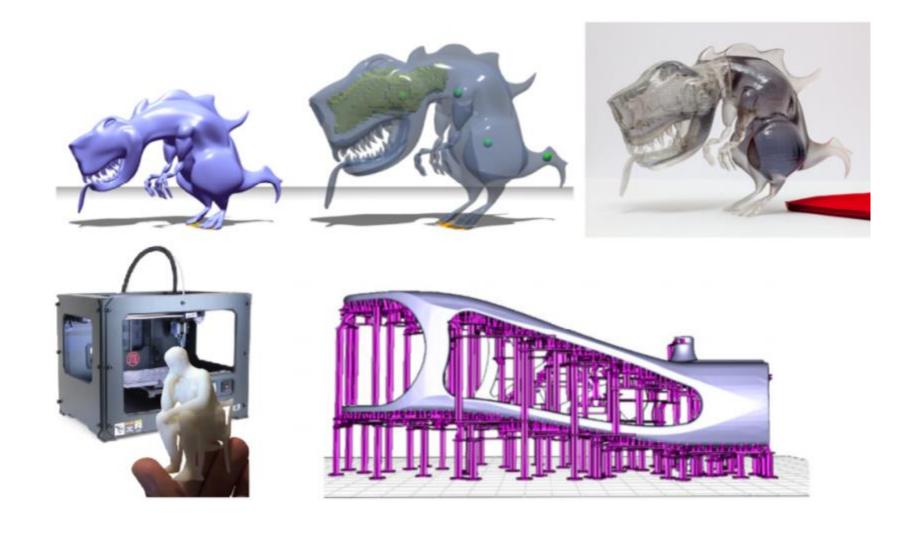

### In laptops, tablets, smartphones

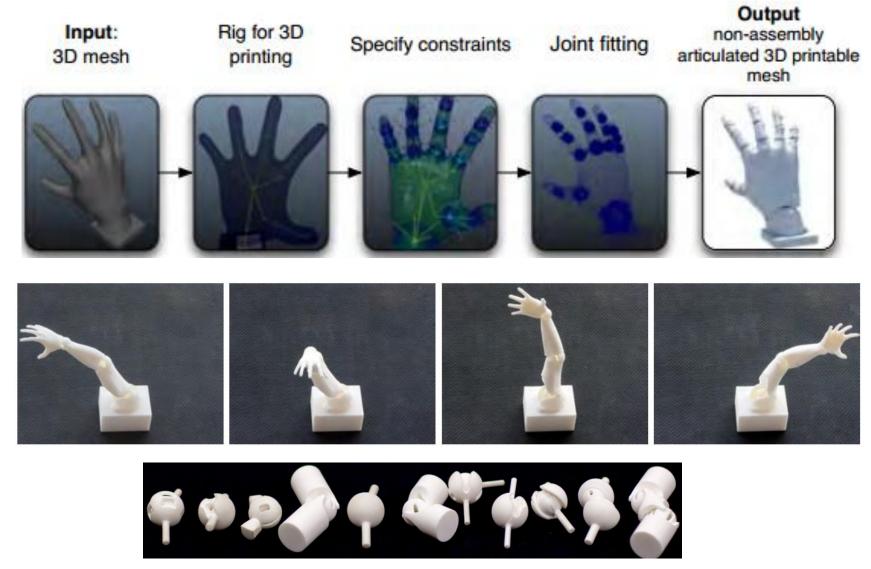

### From Capture to Fabrication

#### Siga12\_3D-Printing of Non-Assembly, Articulated Models

2017/2/22

### Realtime Future

#### Why Realtime?

VFX/Game Production

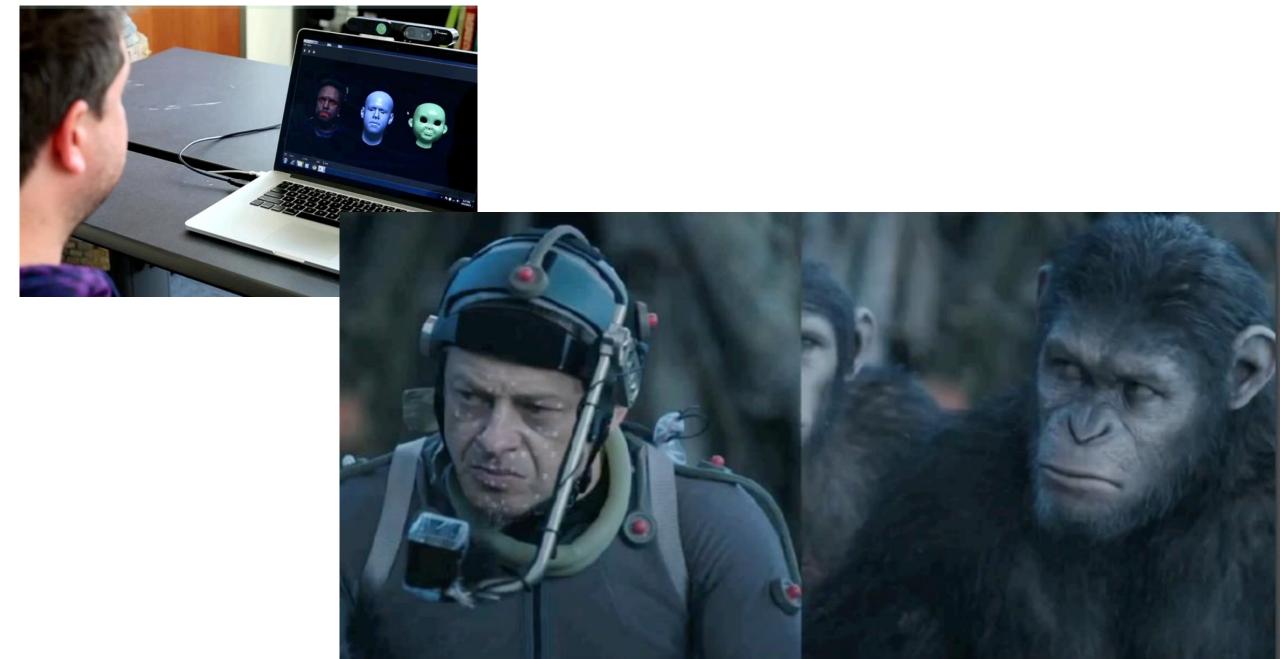

Virtual Avatars

Robotics

AR/Virtual Mirror

### Realtime Facial Performance capture

## Siga10\_A Practical Appearance Model for Dynamic Facial Color

2017/2/22

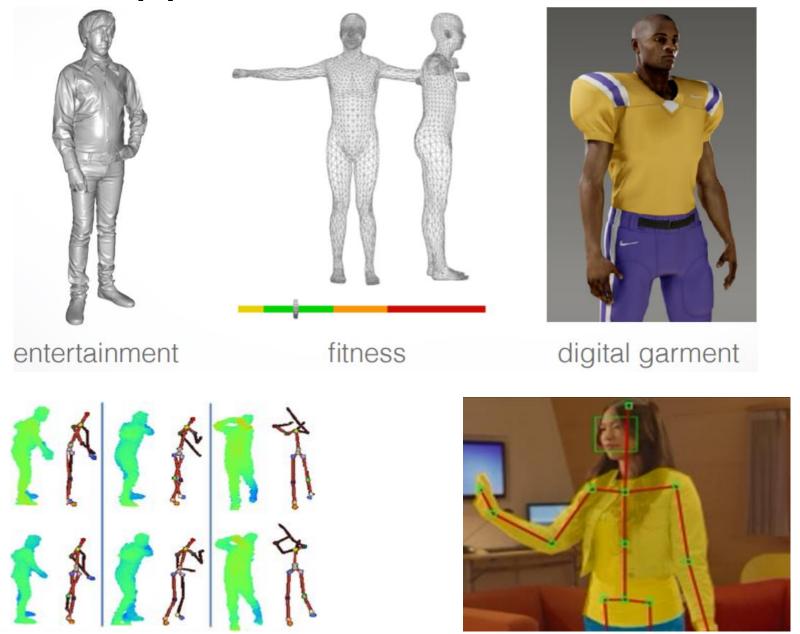

### Personalized Future

#### 3D Self-Portraits

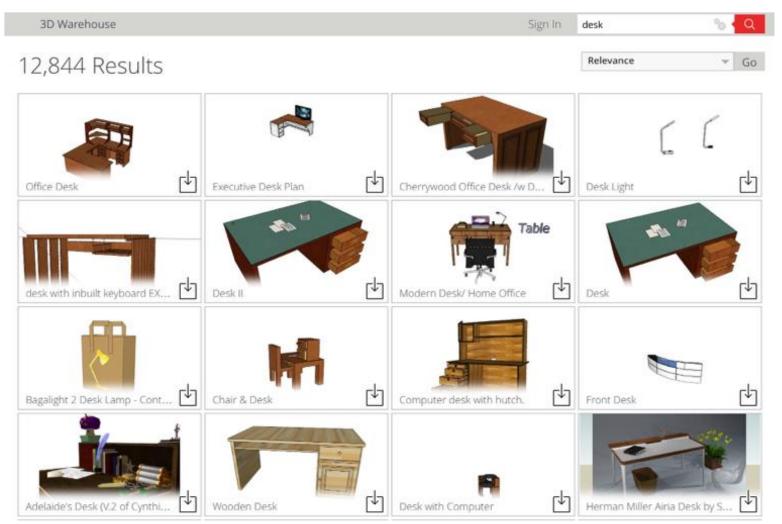

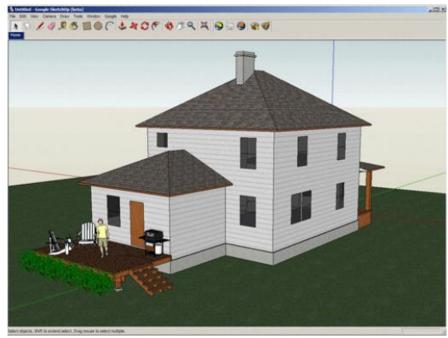

#### Personalized Applications

## Big data

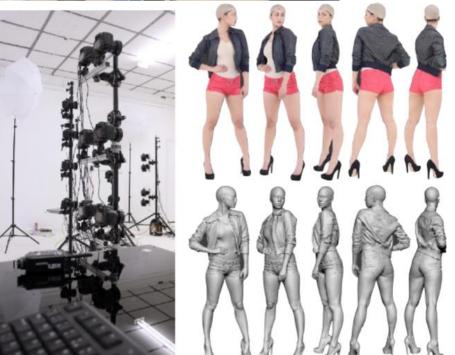

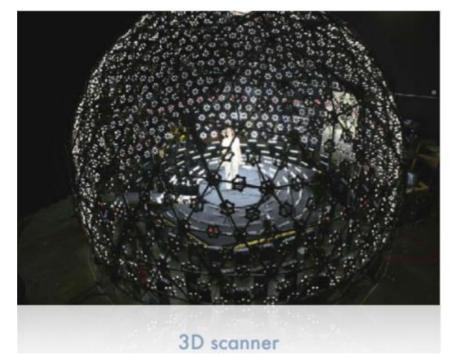

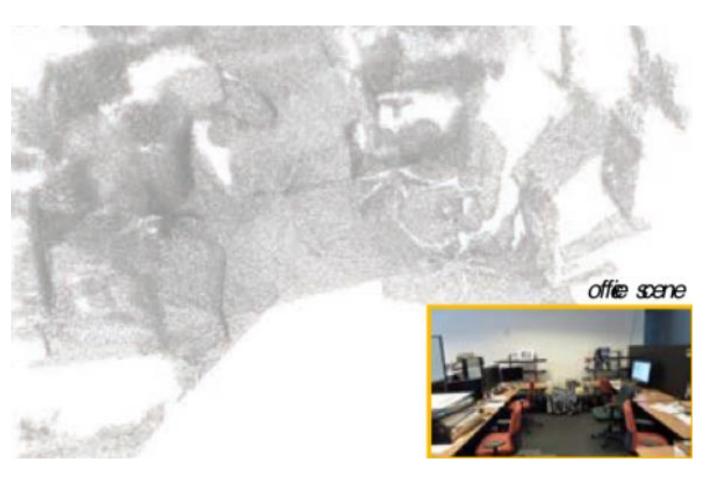

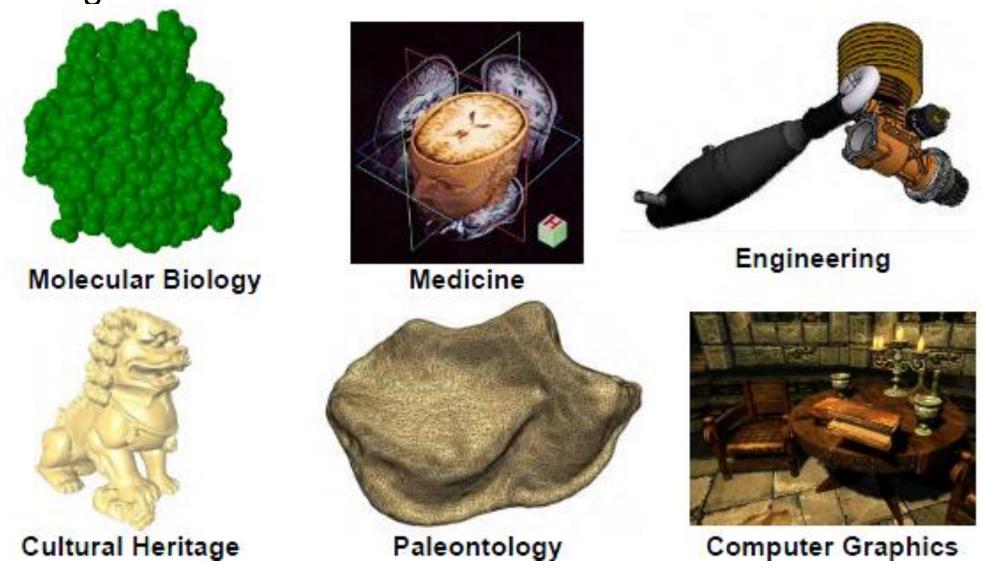

**RGB-D** data

#### **Motivation**

Lots of geometric data in different domains!

ultrasound

MRI scanner

x-ray diffractometer

# Geometry γεωμετρία

radio telescope

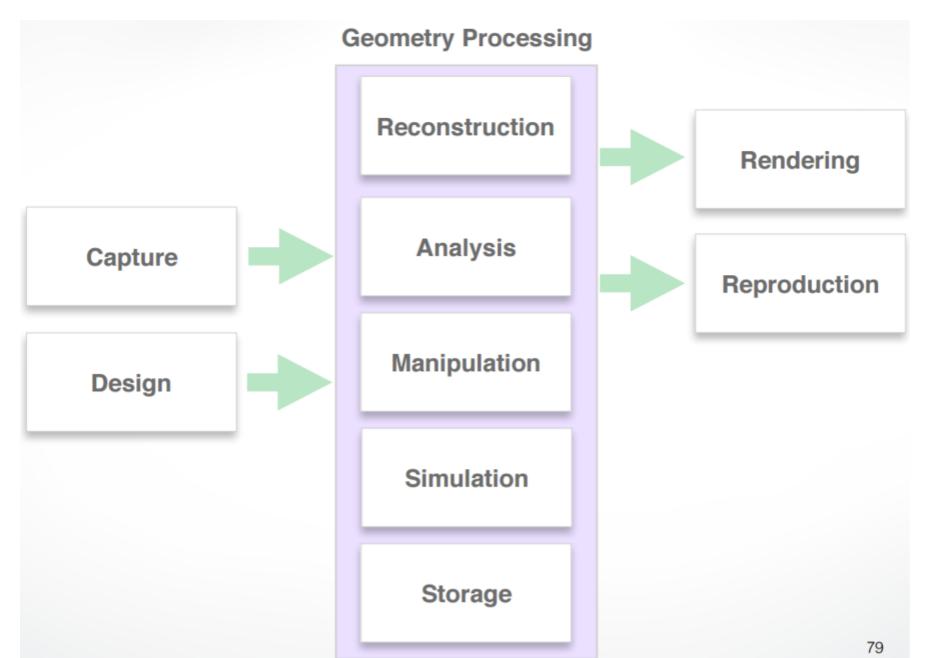

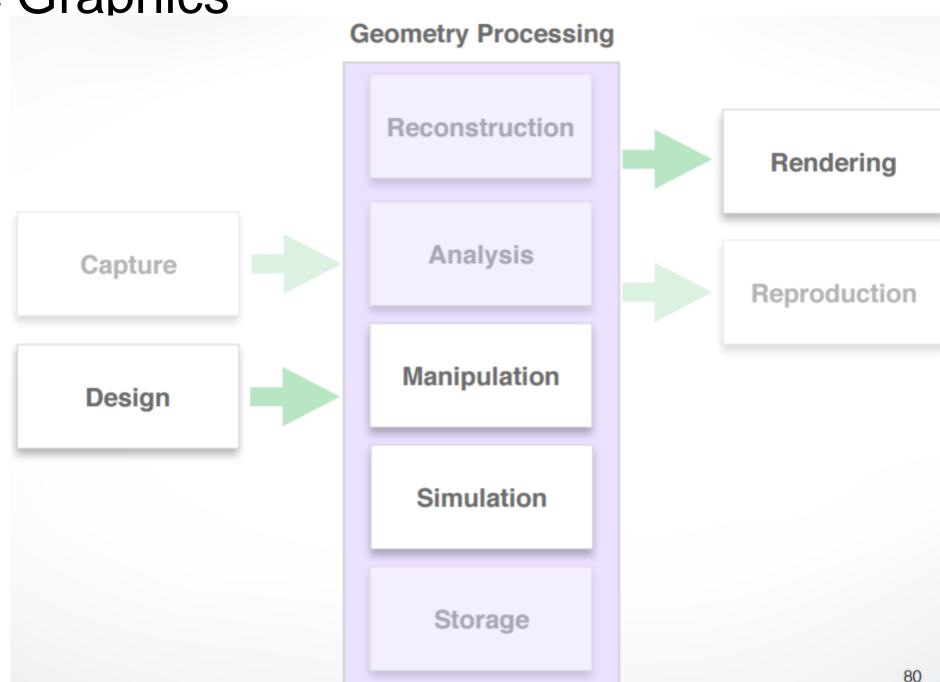

time-of-flight scanner

## Summary

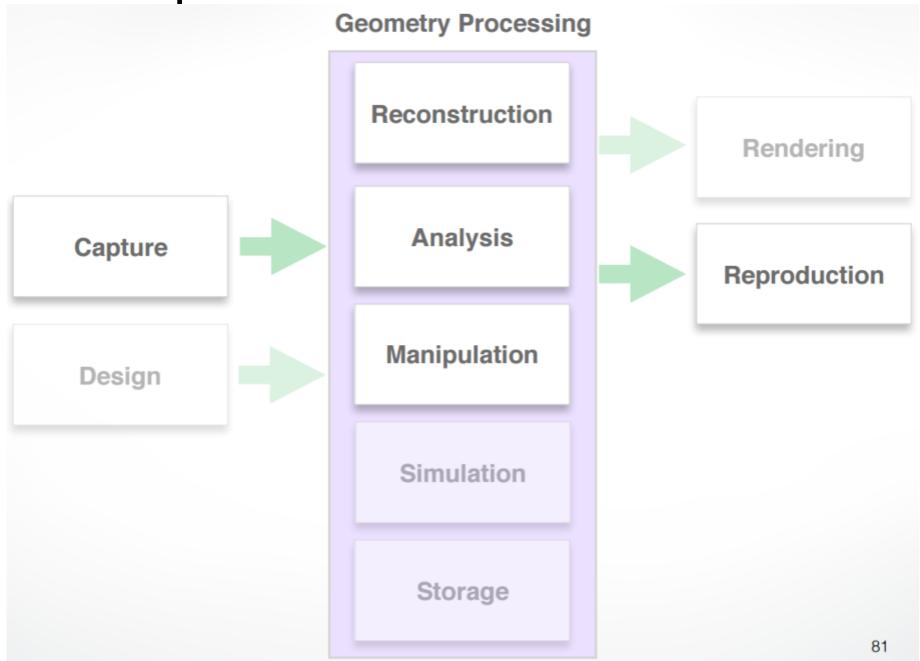

#### Summary

Classic Graphics

#### Modern Graphics/Vision

#### The Future: Big Data / Robotics
